SCIENTIFIQUE

Objective

Build and maintain a **sustainable** European **infrastructure** where **content** and **functionality** resources can be openly **shared** and **integrated** for use by any application or community

Motivations:

Multiple institution sites

- High installation and maintenance cost for hardware and software
- Repeated efforts
- Disconnected repositories

Motivations:

Service providers

Motivations:

Institutional, National and Thematic service providers

- High installation and maintenance cost for hardware and software
- Repeated efforts
- Disconnected repositories
- Sometimes desired policy
- Often undesirable

DRIVER e-Infrastructure Vision

Moving from
building **individual** repositories
or repository clusters,
one at a time,
repeating “things” again and again,

to building an **INFRASTRUCTURE**,
able to facilitate the above

Main Activities:

building the e-Infrastructure

DRIVER Infrastructure

Building through sharing

Main Activities:

Building the organization

- Very variegated situation across Europe
 - Few National initiatives
 - Multiple competing organizations and/or sparse repositories
 - Different policies and procedures

Actions:

- **Identify an appropriate organisation, a set of agreed (harmonised) policies and a systematic approach to the sharing of repository content at European level**
- **Community Building**

Organisation

- **Confederation for European Digital Repositories**
(lead by Univ. of Goettingen)

Hierarchical organization

Current DRIVER content

Current DRIVER deployment

Next steps

- From a test-bed to a production infrastructure
- From metadata and textual documents to compound objects and data
- Towards a European Repository Confederation

Italy in DRIVER

- PUMA's repositories are registered in DRIVER
