Research communities

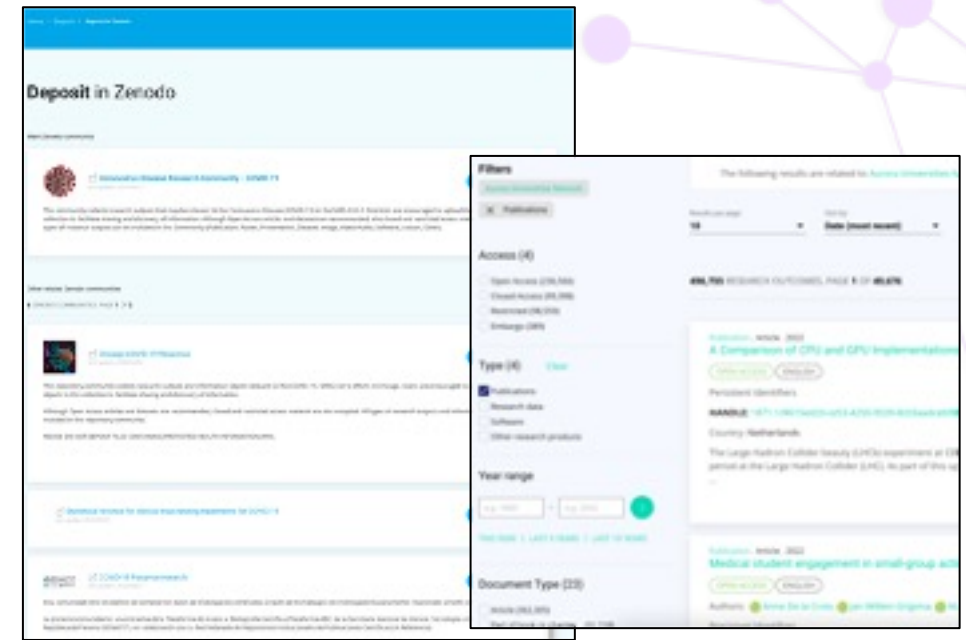

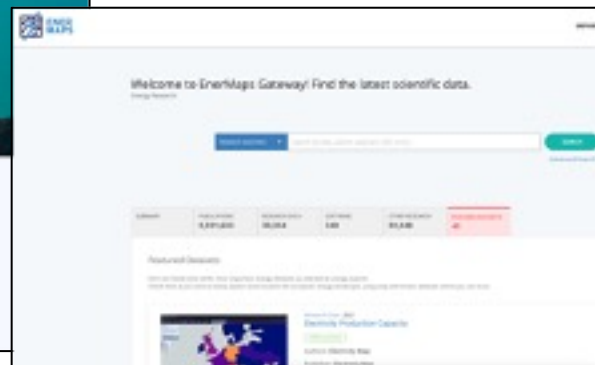

<https://connect.openaire.eu>

It **lowers** the barriers that hinder the adoption of **Open Science publishing practices** in the research community

- Discovery in the literature and data deluge
- Dispersion of research products
- Lack of community awareness
- Lack of Open Science publishing services and tools

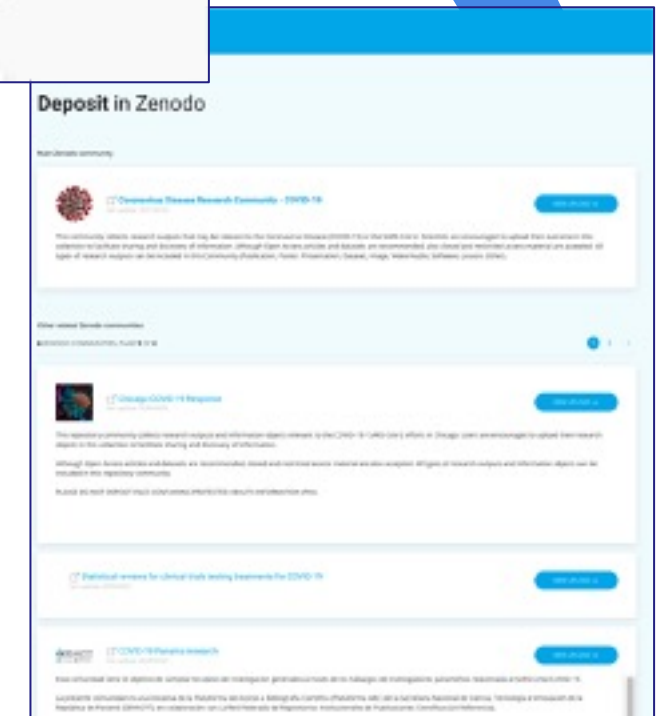

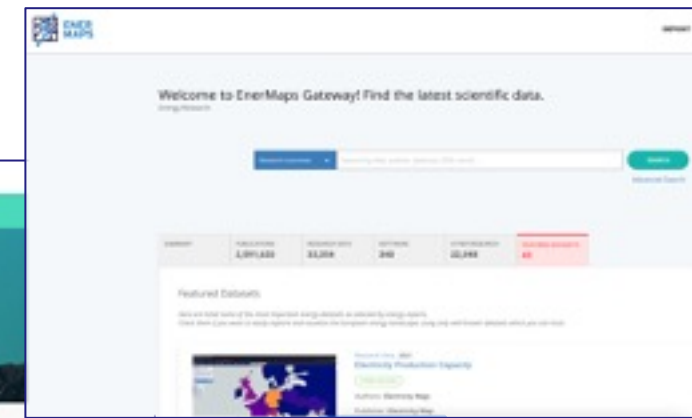

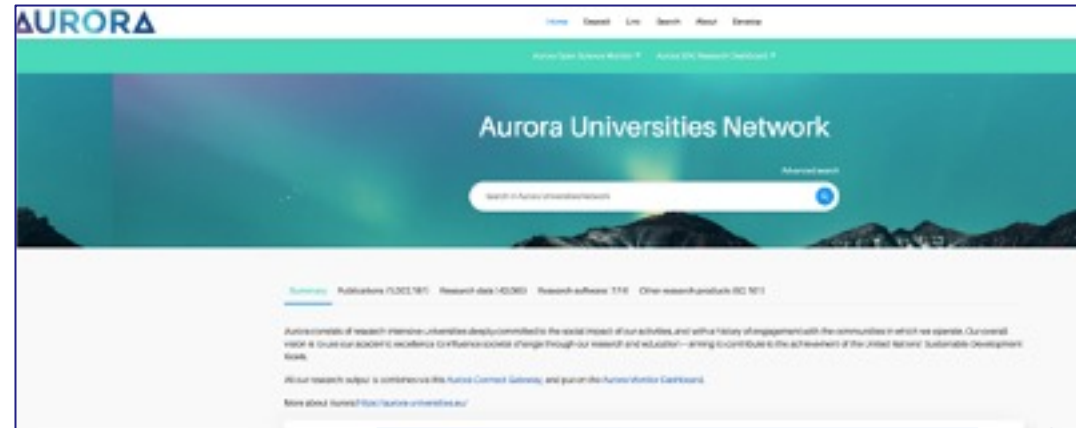

OpenAIRE CONNECT is a tool for Open Science, community building and outreach

A portal with:

- A customised view of the OpenAIRE Graph
- Discovery and tracking functionality
- Complete branding capabilities

A facilitator of OS practices

- Linking & claiming research
- Finding repositories
- Open & FAIR metadata

Find the appropriate repository

Two time-series of transactions may be observed in different overlapping windows, serially dependent, heteroscedastic, and cross-sectionally dependent. Fitting a regression model to each of the two time series, we construct an improved least squares estimator in one series exploiting the cross-sectional...

Geographical representation under a single nationwide district

Publication in Article - 2024 - Netherlands - English - MSc (MPhil) - The National Pub...

Authors: [Maartje Wagenvoort](#), [Erik Louwman](#)

DOI: 10.1111/Mag.12408 [HARVARD](#): 1882/0013715 [DOI](#)

Previous studies have demonstrated the common occurrence of constituency focus in parliamentary questions, which is most often attributed to electoral incentives. If an electoral system makes use of a single nationwide district, however, these district-oriented electoral incentives do not apply. RPs may still...
